DREER'S GOLD MEDAL GLADIOLI

Our Gold Medal Blends are made up entirely of named sorts, grown separately and blended according to a carefully considered formula, so that there may be a proper balance of the various colorings and shadings. The four sections are entirely free from Primulinus sorts, or as free as it is humanly possible to keep them. We have found through bitter experience that it is impracticable, and indeed impossible, to offer Gladioli that have been grown in mixture, with any degree of satisfaction to either ourselves or our customers. Such mixtures soon become loaded with undesirable but rapidly propagating sorts and the whole color scheme is thereby thrown out of perspective.

In our blends we use only the finest named kinds and no variety enters into them that is not large flowering, with attractive color, good texture, spike and placement. All are sorts that are well worth growing individually.

Section One. The range of coloring extends from rich rose, through old rose, rose ash, orange scarlet and bright red, to deep crimson and velvety maroon. **45 cts. per doz.; \$2.75 per 100; \$22.00 per 1000.**

Section Two. From palest blush to warm deep pink and soft rose, from cream and primrose to citron yellow and salmon orange, together with snowy and tinted whites and other sorts splashed or stained with deeper blending shades, the colorings of our Gold Medal No. 2 Blend carry always a strong appeal. **45 cts. per doz.; \$2.75 per 100; \$22.00 per 1000.**

Section Three. Pale lavender, deep blue, lilac, heliotrope and amaranth, with velvety royal purple,—all of the rich "Pansy" shades have been garnered for this blend. **60 cts. per doz.; \$3.25 per 100; \$32.00 per 1000.**

All Sections Mixed. An actual mixing in due proportion of bulbs from the three numbered blends. If you want all of the possible Gladiolus colorings, you should find them here. **45 cts. per doz.; \$2.50 per 100; \$20.00 per 1000.**

Pot Plants of Cannas one of our Specialties

We are again this season preparing a large stock of Cannas established in 3-inch pots for delivery April 1st and throughout the spring months. We have specialized in these for a number of years and the annually increasing demand convinces us that these plants are appreciated by the trade.

The florist who prepares for the demand for Easter plants will find this well-established stock, of which we can make delivery either before or immediately after Easter, a profitable investment. The plants will be in proper condition to shift at once into 4- or 5-inch pots, thus making ideal plants for sale at bedding-out time.

Prices for well-established plants in 3-inch pots, ready for delivery April 1st, are for the above list of varieties: \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

NEW HYBRID TEA ROSE *OLYMPIAD*

(*Mme. Raymond Gaujard*)

New Hybrid-Tea
Rose, Olympiad

One of the late Mr. Pernet-Ducher's seedlings that did not develop its bloom until after this great rosarian passed away in 1929. It was shown in France under the name *Mme. Raymond Gaujard*, but will now be known as *Olympiad* which name has been adopted in connection with the International Olympic games which will be held in California this season, the year of the distribution of this grand new Rose. The entire American stock of this variety is controlled mutually by Messrs. Howard & Smith and ourselves, as have been all of Mr. Pernet-Ducher's introductions since 1921.

We believe *Olympiad* to be the sensational Rose of the decade and the outstanding novelty of 1932. The color is absolutely unique—a lustrous dark oriental scarlet, its depth and warmth accentuated by a bright golden base. This richness is further intensified by a marvelous velvety sheen that renders the flower exceedingly effective especially in

artificial light, with a scarlet glow of flame-like brilliancy. The distinctive beauties of *Olympiad*, conspicuous though they are, have been found indescribable even by the experts; words cannot convey a true and accurate conception either of its bizarre and exquisite coloring or its superb form. It is the Rose of supreme loveliness and cannot be visualized but must be seen.

The bud is long and pointed, the petals are very broad, and the blossom is magnificent in every stage of development. It is long-stemmed, a splendid keeper, and a peerless cut-flower. The plant is amply furnished with healthy, handsome dark-green foliage, practically immune to disease. *Olympiad* is equally valuable for planting under glass and as a subject for the rose garden, growing vigorously and blooming freely in either case.

We offer strong, two-year-old, field-grown, dormant, budded plants at \$125.00 per 100, or in lots of 500 or more at \$80.00 per 100.

Autumn (L. B. Coddington, 1928). We have been pleased with *Autumn* in our fields during the past two seasons where its medium-sized buds and cupped double flowers, on account of their novel coloring, burnt orange streaked with red, have attracted much attention. The plant is of strong growth with healthy foliage, producing its moderately fragrant flowers freely. \$75.00 per 100.

Bloomfield Flame (Capt. George C. Thomas, Jr., 1930). An interesting novelty with vivid and handsome colored long pointed flame red buds, opening to lasting fragrant flowers of 20 to 24 petals which gradually merge from flame red to pink with orange yellow centre. These are borne singly on long stems with abundant, glossy, dark green, bronzy, healthy foliage. \$60.00 per 100.

Caledonia (Dobbie & Co., 1928). Large, very long pointed conical buds with the edges of the outer petals gracefully rolled back; flowers very large and full double, high centre, slightly fragrant and borne singly on long strong stems. Color, when first expanding, slightly lemon tinted, changing to a pure white as the flowers develop. Habit very erect, of vigorous constitution, dark green disease-resistant foliage, and a continuous free bloomer; a fine garden Rose. \$60.00 per 100.

Charles P. Kilham (Beckwith & Sons, 1926). A brilliant distinct and striking novelty which we know will appeal to and please every Rose lover. The buds are long pointed and perfect shape, opening to high centered, perfectly formed, full double flowers of a rich and brilliant Oriental red, flushed with orange and glowing scarlet. A vigorous grower; very free flowering and sweetly tea-scented. \$60.00 per 100.

New Hybrid-Tea Rose, Caledonia

E. G. Hill (E. G. Hill Co., 1929). Among the many Roses raised by Mr. Hill we consider this new red variety one of the most valuable. While it has gained great popularity as a winter cut flower, it is equally good for garden purposes, the long buds of perfect form, as well as the high centered full double flowers are of a dazzling scarlet, shading to a deeper pure red as they develop; of strong vigorous and free flowering habit. **\$60.00** per 100.

Elizabeth of York (Dobbie & Co., 1927). Beautifully formed long pointed buds of a glowing cerise-red with yellow suffusion at the base; the petals as they unfold spread widely with a splendid reflex ultimately showing the stamens. An artistic, dainty, delicately colored flower. **\$40.00** per 100.

Evert Van Dyk (G. A. Van Rossem, 1931). With the many good pink Roses now in cultivation the standard to induce us to offer a new variety is naturally placed high, and we are convinced that in this new Dutch variety, which has been named by the introducer in honor of one of the sponsors of the trans-oceanic flight of the "Southern Cross," that we have a variety, which in its color, a bright rose-pink with salmon suffusion, and superior habits, we can recommend with full confidence. **\$60.00** per 100.

Heinrich Eggers (W. Kordes, 1928). Well shaped, long spiral buds and large bold full double high centered flowers of perfect shape. Color an orange tinted pink with yellow shadings at base. Very strong free flowering habit. **\$75.00** per 100.

Hilda (Cant & Son, 1928). Large globular buds and very large extremely double, very lasting, slightly fragrant flowers of a bright carmine, the inner petals shading to light pink, usually borne several together on long stems. Growth very vigorous, a splendid continuous, profuse bloomer. **\$60.00** per 100.

Dainty Bess (Archer, 1925). An appropriate name for a dainty colored and well formed single flower, 3½ inches in diameter composed of delicately crinkled and wavy petals of a pleasing shade of shell pink with a conspicuous bunch of crimson stamens. The flowers last well when cut and are charming when displayed in individual vases. A strong, vigorous grower and profuse flowering, the flowers being produced on strong stems. **\$40.00** per 100.

Dr. Edward Deacon (Morse & Son, 1926). Fascinating in color, the margin of the petals being a delicate tint of coral pink gradually merging to a deep salmon-orange toward the base of the artistically reflexed petals, forming a fine, very full flower, that has good lasting qualities. The habit of the plant is ideal, upright, strong and free flowering, with very healthy foliage. **\$60.00** per 100.

Duchess of Atholl (Dobbie & Co., 1928). The coloring of this new variety is uncommon and delightful, an old golden-orange flushed with peach pink, particularly attractive in the bud and open state, growth vigorous, a free and continuous profuse bloomer. **\$60.00** per 100.

Duchess of York (Sandy Dickson, 1925). Good sized well formed double flowers of unique and distinct coloring; a pretty shade of tangerine orange with rose suffusion, passing to golden rose-pink as the flowers develop. A good free-flowering garden variety. **\$40.00** per 100.

Edith Nellie Perkins (Alex. Dickson & Sons, 1923). Entirely distinct in coloring and of such strong robust growth that it should succeed anywhere and produce an abundance of its pretty colored flowers. The buds are long and pointed, the outside of the petals are of cream and blush shaded with orange at the base, the inner face is salmon-pink with golden-orange base; the flowers are moderately double, produced on long stems and sweetly scented. **\$60.00** per 100.

New Hybrid-Tea Rose, *Lucie Marie*

Impress (Alex. Dickson & Sons, 1929). A novelty which on account of its coloring and its perfectly formed large double flowers will please every Rose lover. The ovoid buds when first unfolding are cardinal-red with orange suffusion and develop into very large, full double very perfect blooms that last in good shape and which are of a pretty salmon-cerise color suffused with a luminous golden sheen. The plant is a strong vigorous upright grower and exceptionally free flowering. **\$75.00** per 100.

Ivanhoe (Easlea, 1928). Large long pointed bud and large high centered, long lasting, intensely fragrant, brilliant scarlet to rich crimson-scarlet flower, borne several together on medium stems; foliage glossy; growth vigorous; a free, continuous bloomer and hardy. **\$75.00** per 100.

Ivy May (Beckwith & Son, 1925). One of the most attractive varieties of Ophelia type. Color a pretty rose pink running to amber at the base, flushed with gold on the outside and at the edges of the petals; glowing and sparkling. Buds of medium size, long pointed and shapely, opening to fairly double, well-formed, sweetly-scented flowers on long strong stems. Habit vigorous and upright; a very free and continuous bloomer. A splendid garden Rose and a beautiful cut-flower. **\$60.00** per 100.

I. Zingari (J. H. Pemberton, 1925). The most vivid shade of orange scarlet that one can picture, rich and glowing; while the flowers are only semi-double it always attracts attention on account of its rich color and is worthy of a place in every garden. It blooms profusely and continuously, usually in sprays of several blooms; the glossy dark green foliage accentuates its vivid color. **\$40.00** per 100.

James Gibson (McGredy & Son, 1928). A glorious glowing crimson-scarlet with velvety sheen, imparting a lustrous radiance to the large, full, beautifully formed flowers of which every bloom develops to perfection. The habit of growth is as near perfect as could be desired, being free, bushy, upright and vigorous and the flowers which are borne profusely all the season, are carried erect on long stems with good disease resistant foliage. A brilliant Rose of exceptional beauty. **\$75.00** per 100.

Joanna Hill (J. H. Hill Co., 1928). This new yellow has gained a well-merited reputation as a winter cut flower and from our observations we believe it will prove equally valuable and meritorious for the garden. The buds are large, long pointed and open to large, full, semi-double, attractive, long lasting, moderately fragrant flowers of a clear yellow with orange yellow heart. They are borne singly on long strong stems; growth vigorous, upright, a profuse bloomer. **\$60.00** per 100.

Jules Gaujard (Pernet-Ducher, 1928). Distinct and beautiful, the large, well-formed double flowers on first opening are of a glistening cochineal crimson which, as they fully develop, pass to a pretty shade of orange-rose. It is of strong, vigorous, branching habit, very free flowering and a variety that we are convinced will become a greatly admired garden Rose. **\$60.00** per 100.

Konigin Luise (Queen Luise) (Weigand, 1927). An exceptionally large, full, globular, well built double white flower that lasts a long time. Of strong vigorous habit of growth with good healthy foliage. The flowers are carried erect on strong stiff stems. A splendid Rose for the garden and for cutting. **\$50.00** per 100.

Lady Forteviot (B. R. Cant, 1928). A garden Rose that we confidently recommend. Large ovoid buds opening to very large, moderately double artistic well lasting flowers of delightful fruity fragrance of a bright golden yellow flushed with cardinal red, borne several together on long strong stems. Growth vigorous, healthy dark green glossy foliage, a hardy continuous bloomer. **\$60.00** per 100.

New Hybrid-Tea Rose, Mevrouw G. A. Van Rossem

Lady Leslie (McGredy, 1929). Of rich brilliant coloring, particularly in the young state. The large, long-pointed buds and double high-centered flowers which are intensely fragrant and long lasting, in the early stages are rosy-scarlet which, as they develop, passes to a scarlet-carmine suffused with saffron yellow on a yellow base. **\$60.00** per 100.

Lady Margaret Stewart (Alex. Dickson, 1926). A Rose of unique color, the flowers in the young stage are a deep sunflower-yellow heavily veined and splashed with orange-scarlet, reverse of the petals deeply suffused with carmine, as the flowers develop these colors intermingle forming a beautiful cadmium orange effect. The bud is long and pointed, opening to a full double flower of pleasing decorative form of delightfully sweet scent. **\$40.00** per 100.

Lucie Marie (Alex. Dickson & Sons, 1930). Very long pointed buds, deep yellow splashed with red. As the outer petals unfold, the inner face is yellow with coppery venation, with the tips of the petals lightly tipped with pink, slightly fragrant. It is of strong, vigorous healthy habit of growth with dark-leathery foliage. A most distinct and interesting bedding variety. **\$75.00** per 100.

Lucile Rand (Pernet-Ducher, 1930). A splendid large flower; in color a lively bright rose-carmine; delicately sweet scented. Its size and formation reminds of Dame Edith Helen but unlike that variety it is an exceptionally strong vigorous grower and a free continuous bloomer throughout the season. **\$75.00** per 100.

May Wettren (Alex. Dickson, 1928). A magnificently formed bud and flower of moderate fullness and artistic coloring. The flowers are composed of immense, deep, wide petals of very solid texture, their formation making a beautifully built long bud and high pointed flower, in which the inner face of the petals evolves from a bright salmon pink in the bud to deep flesh pink; then to bright pink in the more developed flower. **\$50.00** per 100.

McGredy's Scarlet. (McGredy & Son, 1930). A new red Rose of marked superiority on account of its strong vigorous growth, free and continuous habit of flowering and its brilliant color. The flowers are of good size, full double of a brilliant scarlet, orangy yellow at base of petals, the upper portions of same being lightly touched with crimson, varying some in color under changing weather conditions but always beautiful. A splendid Rose for the garden. **\$75.00** per 100.

Mevrouw G. A. Van Rossem (Van Rossem, 1926). A marvelously beautiful Rose with a unique color combination not found in any other variety, a most striking blending of dark vivid orange and apricot on a golden yellow ground with frequently touches of bronze on the reverse of the petals. The sweet-scented flowers are very large, of perfect formation both in the bud as well as in the fully developed flower and are produced freely on vigorous upright growths. **\$40.00** per 100.

Mme. Nicholas Aussel (Pernet-Ducher, 1930). In a contest at Lyon, France, Sept. 15th, 1931, was voted an award of a Gold Medal as The Most Beautiful Rose in France. An outstanding introduction of the late Mr. Pernet-Ducher. In color a bright coppery red in the very long, shapely tapering bud that develops into a large full double flower of an exquisite opalescent salmon pink. Growth vigorous and healthy, free and continuous bloomer. **\$75.00** per 100.

Monarch (Dobbie, 1926). Very large long pointed buds developing into large double high centered flowers, very lasting, of a rich silvery pink color, borne singly on long stout stems. A strong vigorous grower and an abundant continuous bloomer; very hardy. **\$60.00** per 100.

Mrs. John Bell (John Bell, 1928). A Rose of exceptional merit, of a most attractive vivid shade of cochineal carmine, with large long pointed shapely buds and very large full double cupped fragrant flowers borne singly on good stems. Growth moderate, bushy habit with disease resistant foliage and a profuse bloomer. A variety that is certain to become popular and which will displace all others of a similar shade of color. **\$60.00** per 100.

Polly (Beckwith, 1927). A splendid Rose of the Ophelia type that will become a general favorite. Buds long and of perfect shape, the centre golden yellow passing to a tender flushed pink towards the edges; as the large full fine flowers develop the golden base comes well up on the petals, the outer petals pass to a creamy white with just the faintest touch of pink. A strong healthy grower and free bloomer. Sweetly scented. **\$75.00** per 100.

Portadown Bedder (McGredy, 1929). New Hybrid-Tea Rose, Schwabenland

Portadown Fragrance (McGredy, 1931). A Rose that pleases us not only on account of its large double flowers but also for its remarkable fragrance of which the introducer, says, "No Rose has ever been raised to compare with this variety for fragrance which is most penetrating and of an entirely distinct sweet odor." The plant is a strong vigorous grower and free bloomer; in color a bright orange-scarlet, passing to bright rose towards the edge of the petals. \$100.00 per 100.

President Hoover (L. B. Coddington, 1930). A glorious Rose, wonderfully free in the easy manner in which it grows and charming in its color arrangement which is a splendid combination of cerise-pink, flame, scarlet and yellow; this combination of colors gives the most dazzling color effect imaginable. The buds are beautifully pointed, the flowers large, composed of broad thick heavy petals, with moderate fragrance. \$50.00 per 100.

President Jae Smits (Verschuren, 1928). For brilliancy in color, a rich velvety crimson-scarlet, exceptionally long pointed buds of ideal shape, produced most generously, we know of no other variety that is its equal. \$40.00 per 100.

Renate (Berger, 1925). Large, very double globular, creamy white flowers of strong fragrance and very good lasting quality usually produced several on a stem. Growth vigorous and bushy; blooms continuously. \$50.00 per 100.

Rosella Sweet (Pernet-Ducher, 1930). Large ovoid bud developing to a splendid large, well-formed, attractive flower of a luminous capucine yellow, with delicate salmon pink suffusion and of strong delicious fragrance. The fine flowers are borne singly on strong stiff stems, the plant is of vigorous upright habit with healthy dark green glossy foliage. \$50.00 per 100.

Schwabenland (Pfitzer, 1928). There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large, over five inches in diameter, with high spiral centre, the petals having a peculiar twist or curl. In color it is a luminous rich rose pink, retaining its brightness until the petals drop, the flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free flowering. \$75.00 per 100.

Souvenir d'Alexandre Bernaix (Bernaix, 1926). A beautiful large cupped flower, $4\frac{1}{2}$ inches or more in diameter. In the half expanded bud the petals are incurved, of an intense deep velvety crimson-red on a maroon ground with touches of scarlet on the outer petals. As the flower fully develops it becomes suffused with vermilion carmine at the edge of the petals. A moderately vigorous grower and a continuous bloomer. \$60.00 per 100.

Stuttgart (Berger, 1928). On the type of Ville de Paris with medium sized, long pointed, shapely bud and double, very lasting, moderately fragrant, pure yellow flowers borne singly or several together on long stems. Growth moderate, bushy; foliage rich green disease resistant; a free bloomer throughout the season. \$50.00 per 100.

Talisman (Montgomery Co., 1929). A combination of shadings of gold, apricot, yellow and deep pink or old-rose. The outside of the petals is bright yellow, gold, and pink; as the flower develops and the petals unfold they become bright apricot, gold, deep rose-pink or old-rose and unlike most Roses the color becomes brighter as the flowers develop. The bud is long, perfectly formed, averaging about 25 to 28 petals, the plant is a strong grower and free flowering. \$50.00 per 100.

Vaterland (Berger, 1928). The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid Perpetual variety Prince Camille de Rohan, a rich deep velvety scarlet maroon and a splendidly formed high centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and remarkably free and perpetual flowering; unquestionably the best of this type that has yet come to our notice. \$75.00 per 100.

W. E. Chaplin (Chaplin, 1929). A most meritorious red Rose of the Lord Charlemont type but better, being a free vigorous grower with healthy disease-resisting foliage. The flowers are large; every bud develops to a perfect full, high-centered, very lasting moderately sweet-scented flower. Color deep crimson, deepening to carmine crimson; does not blue or burn; these are carried on long strong stems, a very free continuous bloomer. \$125.00 per 100.

William E. Nickerson (Easlea, 1928). Very attractive and distinct, a glowing orange cerise, large, ovoid buds, developing into full double high-centered flowers of perfect form; very lasting, moderately fragrant, borne singly on long strong stems. A hardy vigorous grower with light green healthy foliage. A free and continuous bloomer. A gem in every way. \$75.00 per 100.

Everblooming Hybrid-Perpetual Rose Mme. Albert Barbier

Introduced several years ago, this remarkable Rose has quickly found its place in popular favor. In its habit of flowering it is as free as many of the popular Hybrid-Tea varieties; its seed parent is Frau Karl Druschki, from which it has inherited a strong, clean, vigorous growth; its buds are long and well formed of a pearly white color suffused with soft, salmony flesh and develop into large, full double imbricated flowers of splendid form which as they expand, show a golden apricot suffused centre. A gem in every respect. \$50.00 per 100.

New Hardy Climbing Roses and Specially Meritorious Varieties

THE NEW DAWN

(THE EVERBLOOMING DR. W. VAN FLEET)

Patent Number 1, the first patent issued August 18, 1931, under the new Patent Law, has been granted to the originators of the New Dawn Rose, giving them the sole rights for the propagation of this desirable new variety.

This new Rose is a sport from Dr. Van Fleet which is universally acknowledged as the best and most popular American Climbing Rose. This new variety is identical in every way with its parent in size and formation of its long pointed flesh pink buds and double flowers, but blooms continuously throughout the summer and fall months. Really the first worth while Hardy Everblooming Climber introduced; a variety that every Rose lover will be anxious to possess. Stock limited, orders filled in rotation as received. \$100.00 per 100.

Chaplin's Pink Climber

This striking novelty originated in the same nursery in which Paul's Scarlet Climber was raised. It is a cross between Paul's Scarlet and American Pillar, of strong growth, perfectly hardy, producing its large flowers, similar in size and form to Paul's Scarlet, profusely in strong trusses of from 8 to 12 flowers each, but in color a rich lively pink. \$30.00 per 100.

The New Climbing Polyantha Rose

Climbing Lafayette or Auguste Kordes

A sport of the popular Bedding Polyantha Rose Lafayette, possessing all of the good characteristics of that desirable variety, but of a strong, vigorous, climbing habit, producing its good-sized, very attractive, bright crimson scarlet flowers very freely in large trusses. The plants are covered with bloom from top to bottom in early summer, with some intermittent periods of bloom during the late summer and fall. \$30.00 per 100.

Mme. Gregoire Staechelin

(The Spanish Beauty)

Mme. Gregoire Staechelin has inherited the best qualities of both of its popular parents, Frau Karl Druschki and Chateau de Clos Vougeot. The long-pointed buds are crimson as first as the sepals divide, then the firm outer petals show splashes of carmine as the flower opens, with an iridescent pearly-pink inside and it is richly perfumed. It grows 12 feet or more and has large disease-resistant foliage. The main stem of the plant shoots upright and the long bloom-spurs stand out 18 inches at right angles, with exquisite, full, fragrant blooms. These blooms come early in June and last over a long period. \$50.00 per 100.

Primrose, the New Yellow Rambler

In this we have what has long been sought after a real hardy rambler, a strong vigorous grower and hardy under the same conditions under which Dr. Van Fleet and similar varieties will succeed. In color light primrose-yellow which is maintained until the petals drop. Its flowers are borne in trusses of from 2 to 5, on long stems, about 2½ inches in diameter. The plant is of vigorous climbing habit, free flowering, mid-season and the flowers last in good condition for a long time, with healthy dark foliage. \$30.00 per 100.

New Climbing Rose Thelma

Similar in habit of growth to Paul's Scarlet Climber, which is one of its parents. The flowers are large for this type of Rose, being 3 inches in diameter, usually with three rows of petals, produced in clusters of from 3 to 13 blooms, which last in good condition a long time. Color a delicate coral pink suffused with carmine. \$30.00 per 100.

Albertine. An Attractive Climber

Though introduced ten years ago is little known. A clean healthy vigorous grower with dark glossy foliage and good sized, double, cupped, lasting, fragrant flowers, borne profusely in clusters in May and June. Color a pretty, delicate coppery salmon pink. \$35.00 per 100.

Jacotte. A Gem Among Climbers

A favorite variety now, but destined to find a place among the most popular, when its merits and distinct coloring becomes better known. In color a deep orangy yellow, tinted coppery red; flowers of good size, semi-double, very lasting, moderately fragrant, borne several together on long stems. Blooms profusely in May and June. \$40.00 per 100.

Marie Gouchault

Flowers similar in size to Dorothy Perkins but more brilliant in color, clear red passing to a bright salmon-pink, borne in large clusters of 30 to 40 flowers; foliage glossy green, disease-resistant. \$40.00 per 100.

Hardy Climbing Rose,
Primrose

Bonfire. The Best Red Rambler

A brilliant red which is superior not only to the old Crimson Rambler but also to Excelsa, rich in color, free in flowering, with good healthy foliage. \$40.00 per 100.

Ernestine Cosme

A gem among Ramblers, of the Hiawatha type, single, very lasting, fire red with large white eye, borne in immense pyramidal trusses of 75 to 100 flowers; very vigorous grower, with glossy, light green, disease-resistant foliage. \$35.00 per 100.

Trailing Rose, Max Graf

Trailing Hybrid-Rugosa Rose Max Graf

Makes an excellent pillar or climbing Rose, but will be found most valuable as a ground cover for which purpose it is far superior to any of the Wichuriana varieties. Its flowers are large, single, bright pink with prettily crimped petals. For planting on a steep bank or for trailing over a stone wall, it has no equal.

Strong 2-year-old budded plants, \$35.00 per 100.

New Double-flowering Gypsophila

Bristol Fairy

A wonderful advance over the old type, a plant not only of greater vigor, producing much larger panicles of flowers, in which the individual bloom is considerably larger, and of purer white color, but it also possesses the advantage of flowering more or less continuously throughout the summer, new branches of bloom appearing after the first flush of flowers has passed, if these are cut away when through blooming.

Select Hardy Vines and Climbers

We Make No Charge for Boxes or Packing

Notice. The following varieties of Hardy Climbers, Ampelopsis, Actinidia, Akebia, Aristolochia, Bignonias, Honeysuckles, Celastrus, and Polygonums, while in a dormant condition during winter and early spring are sent out with bare roots without soil. As the season advances we can usually supply all of these varieties in pot plants with the ball of soil intact.

Akebia Quinata

Strong two-year-old plants, \$3.50 per doz.; \$25.00 per 100.

Ampelopsis Engelmanni

Strong two-year-old field-grown plants of this most useful variety. \$3.00 per doz.; \$20.00 per 100.

Ampelopsis Lowi

A splendid variation from the popular Boston or Japan Ivy, possessing all the merits of the parent, being perfectly hardy, clinging to the smoothest surface without support, and with much smaller foliage, which is deeply cut, giving it a grace and elegance entirely distinct from the old type. In the spring and summer the leaves are a bright fresh apple-green color, changing in the autumn to various brilliant tones of orange, crimson and scarlet. 3-inch pots, \$3.50 per doz.; \$25.00 per 100.

Ampelopsis Quinquefolia (Virginia Creeper)

Strong two-year-old field-grown plants, \$2.50 per doz.; \$20.00 per 100.

It bears attractive yellow flowers which are succeeded by edible fruit the size of a walnut, with gooseberry flavor. Hardy south of Washington. 75 cts. each; \$7.50 per doz.

Clematis Montana Undulata

(Anemone Clematis)

The illustration in colors in our retail catalogue for 1932 conveys a good idea of the attractive flowers of this gem among climbing plants. It is a strong vigorous grower, perfectly hardy, disease and insect proof and will succeed and flourish under the most adverse conditions. The Anemone or Wind-flower-like blooms are white flushed mauve pink, and are from 1½ to 2 inches in diameter and frequently begin to expand as early as the last week in April, just about the time when Wisterias have finished, continuing in bloom well through May, and are produced in great profusion. The best of the early spring-flowering climbers of which there are but few.

Japanese Flowering Cherries

The display of Japanese Flowering Cherries at Washington, D. C., in early spring is one of the great sights of our national capital and annually attracts thousands of visitors.

These Cherries are among the earliest trees to flower, coming into bloom early in April. The different varieties, single and double, extend the flowering season for fully four weeks, the attractive single-flowered varieties coming into bloom first, followed by the double sorts. They are perfectly hardy, and will succeed in almost any location.

We offer eight of the choicest varieties, six erect growing and two weeping varieties, a selection made for us by one of the most experienced growers.

Erect Growing Varieties

- Daybreak.** One of the earliest to bloom, flowers single pink appearing before the leaves in greatest profusion.
Naden. One of the prettiest double pinks, the petals are so numerous as to make the flower a perfect tuft.
Pink Pearl. The earliest of the doubles. Flowers fully 1½ inches in diameter, light pink shading deeper at the edges; very free.
Takasago. Double light pink massed into large compact clusters, very showy, blooms before the leaves appear.
Ukon. Unique in having yellow flowers slightly tinted green, as the flowers mature the veins in the petals change to cerise; late flowering; semi-double.
Victory or Shirofugen. Very double, up to 2½ inches in diameter borne in racemes of about 3 each on long stems; flowers open a delicate pink changing to white; late flowering.
Price. Any of the above in strong plants 4 to 5 feet high \$2.50 each.

Weeping Varieties

- Eureka Weeping** (Japanese Weeping Rose Flowering Cherry). A single light pink that has been grown in this country for 50 years, a tribute to its beauty and popularity.
Park Weeping. Differs from the above in the color of its flowers which are of a deep pink and a stronger grower.
Price. Either of the above two Weeping Varieties on 4-foot stems, strong one-year-old heads \$3.50 each

Daphne Cneorum (Garland Flower)

A pretty dwarf spreading Shrub from 6 to 8 inches high, valuable for the rockery or for the front of the border, producing beautiful bright pink, sweet-scented flowers early in May. Strong bushy plants 8 to 10 inches in diameter, 75 cts. each; \$8.50 per doz.; \$65.00 per 100.

Golden Variegated California Privet

We offer a splendid lot of two-year-old plants, nicely trimmed, very bushy specimens, from 12 to 15 inches high, which, if potted in 6-inch pots, will make most valuable material for use in window or porch boxes and other plantings. \$3.50 per doz.; \$25.00 per 100.

We also offer three-year-old bushy plants, 24 to 30 inches high, \$4.50 per doz.; \$35.00 per 100.

One-year-old stock for lining out, 12 to 15 inches high, \$10.00 per 100; \$80.00 per 1000.

Kolkwitzia Amabilis (Beauty Bush)

An exceedingly handsome new ornamental Shrub from the wilds of China, resembling the Weigela and Honeysuckle to which it is allied. Growing 6 to 8 feet high at maturity, with long arching branches, this variety combines all the merits of a perfect Shrub; hardness, year-round beauty of foliage and habit, and an amazing profusion of pale-pink bell-shaped flowers in June. Strong plants 18 to 24 inches high, \$4.00 per doz.; \$30.00 per 100.

Nandina Domestica (Chinese Bamboo)

A very handsome small Shrub, hardy as far north as Philadelphia; it grows about three feet high with graceful, light green foliage, which turns to a most attractive bronzy red early in the fall. The small white flowers are produced in good-sized erect panicles in spring and are followed by crimson berries. Strong 5-inch pots, 65 cts. each; \$6.50 per doz.

Pyracantha (Crataegus) Coccinea Lalandi (Firethorn or Evergreen Thorn)

There is no other fruiting evergreen Shrub that is so attractive throughout the year as this fiery Thorn, and which will succeed in any fairly sunny position, developing into a shapely plant 6 or more feet high; it may be planted either in connection with other Shrubs or as a single specimen or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter produce a gorgeous effect. Strong pot-grown plants 15 inches high, 75 cts. each.

Viburnum Carlesii

A rare Korean variety which is entirely distinct with salver-shaped flowers of a delicate rose tinted white, passing to white sweet-scented flowers produced in terminal subglobose cymes 2 to 3 inches in diameter, reminding one somewhat of a spray of Bouvardia. Good bushy specimens 2 to 2½ feet high, \$1.50 each.

Viburnum Rhytidophyllum

A rare variety, particularly attractive on account of its large dark green nearly evergreen foliage, the yellowish white flowers are followed in September by red berries finally turning black. 4-inch pots, 75 cts. each; 7-inch pots, \$1.50 each.

Vitex Macrophylla

In general habit similar to *V. Agnus Castus*, but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub.

Field-grown plants, one-year old, 15 to 18 inches high, \$2.50 per doz.; \$20.00 per 100.

General List of Select Hardy Shrubs
